**PROSPERUS ENTERS PARTNERSHIP WITH INDEPENDENT PHYSICIANS
NETWORK OF WISCONSIN**

*Company to offer complete package of practice management services to IPN's more than
1,000 member physicians*

MILWAUKEE, Wis. – ProSperus, the Milwaukee-based full service practice management company, today announced it has entered into an exclusive partnership with the Independent Physicians Network of Wisconsin (IPN). The partnership makes ProSperus a preferred IPN vendor – offering the network's more than 1,000 member physicians access to a complete suite of personalized practice management services designed to increase productivity and enhance performance and compliance.

“We are thrilled to be selected by IPN and offer our services to its members,” said Tom McBride, CEO of ProSperus. “The personalized services ProSperus will bring IPN's member physicians will help them to remain in control of their practice by effectively leveraging the right technology, processes and staff to ultimately enhance the long-term profitability of the practice.”

IPN's members will have access to a wide variety of specialized practice management services from ProSperus, including appointment setting, insurance verification through electrical medical records, revenue cycle management, staffing and practice analytics. Physicians will be able to choose just one or the entire suite of services to consistently enhance performance and compliance.

“We believe ProSperus' expertise in the practice management arena will bring our members the specialized tools and resources they need to overcome the daily challenges they face in today's healthcare industry,” said Michael Repka, CEO and executive director of IPN.

According to Repka, IPN selected ProSperus after an exhaustive review and found the accuracy and efficiency of its services to stand above the other companies in the revenue cycle management industry.

“We strive to provide our members the most effective resources available on the market,” said Repka. “This includes giving them access to tools to help manage every facet of their practice – allowing them to spend more time practicing medicine and less time on front desk and back office issues.”

About ProSperus

ProSperus offers full service practice management to physicians—from primary care physicians to office-based specialists. No newcomer to revenue cycle management, the company is based on 20 years of experience and the industry’s highest level of claims processing accuracy and resolution. ProSperus has a complete suite of best-in-class software and services and currently assists over 500 physicians and manages about 15 million transactions annually. The complete ProSperus solution improves the efficiency of processes from the implementation of PMIS/EMR systems to revenue cycle management, credentialing, administrative staffing and practice analytics. Physicians can choose just one or the entire suite of services to consistently enhance their practice performance and returns. For more information, visit www.prosperusrcm.com.

Independent Physicians Network, Inc.

IPN is a physician managed and controlled medical delivery network established in 1984. There are over 1,000 member physicians in the network who utilize all hospitals in the Milwaukee and surrounding areas. IPN also offers patient access to many free standing centers such as imaging, laboratory and therapy sites. Member physicians currently provide medical services to over 105,000 Medicaid, Medicare and Commercial enrollees through contracted health plans. IPN is a not for profit corporation and is fully managed and controlled by member physicians. For more information about IPN, visit <http://www.ipn-wi.com/index.php>.
