**PROSPERUS ENTERS PARTNERSHIP WITH TIOPA, INC.
TO IMPROVE CLINICAL AND BUSINESS PERFORMANCE**

North Texas IPA to benefit from full-service practice management services

MILWAUKEE, Wis. – ProSperus, the Milwaukee, Wis.-based full-service practice management company, today announced its partnership with TIOPA, Inc. The partnership makes ProSperus a preferred TIOPA vendor – offering the network’s more than 300 independent member physicians access to a complete suite of personalized practice management services designed to improve efficiency, increase productivity, and enhance performance and compliance.

“We are excited to begin working with TIOPA and to help its many members remain in control of their practices,” said Tom McBride, CEO of ProSperus. “As a full-service practice management partner, ProSperus will help TIOPA’s member physicians customize solutions that leverage the right technology and processes to efficiently maintain and grow their practice.”

Two of the challenges independent physicians face today are billing and electronic medical records (EMR) implementation, according to David Atkinson, TIOPA Executive Director and board Secretary. He also noted that ProSperus’ expertise in these services is offered at a more competitive rate than many North Texas physicians are currently paying.

“ProSperus speaks directly to the problems independent physicians in North Texas encounter and offers the services needed to streamline practices and help our physicians avoid the back-office pitfalls they currently face,” Atkinson said. “The ProSperus suite of practice management services will allow our members to spend more time with patients and less time on front-desk and back-office issues.”

TIOPA’s members will have access to all of ProSperus’ specialized practice management services, including billing, insurance verification, electronic medical records, revenue cycle management, collections, staffing and practice analytics. Physicians will be able to tailor the ProSperus services used to increase revenue and efficiency, decrease practice management time and focus on patient care.

About ProSperus

ProSperus offers full-service practice management to physicians—from primary care physicians to office-based specialists. No newcomer to revenue cycle management, the company is based on 20 years of experience and the industry’s highest level of claims processing accuracy and resolution. ProSperus has a complete suite of best-in-class software and services and currently assists over 500 physicians and manages over 15 million transactions annually. The complete ProSperus solution improves the efficiency of processes from the implementation of IT infrastructure and EMR systems to revenue cycle management, credentialing, administrative staffing and practice analytics. Physicians can choose just one or the entire suite of services to consistently enhance their practice performance and returns. ProSperus Services are available without capital expenditure on a pay-as-you-benefit model. For more information, visit www.prosperusrcm.com.
